Special Meeting to Develop a Plan to Consolidate SGS Special and Other Publications

2022 Executive present: Samantha Van De Kerckhove, Brendan Bishop and Brian Brunskill.

Follow up telephone confirmation with Mike Thomas.

Preamble:

- Hard copies of SGS Special Publications series dating back to 1978 have been stored at the Survey's subsurface lab for many years now, as a free service to the SGS.
- The lab manager, Earline Mack, has requested that the SGS reduce the amount of space taken for these publications as the lab would like to repurpose this space,
- All SGS publications have been digitized and are available to purchase on-line,
- It has been several years since a hard copy book has been requested for purchase.

Resolution by Brian Brunskill, seconded by Sam Van De Kerckhove:

- Be it resolved that the SGS keep two physical copies of all SGS publications in permanent storage at the lab and provide one copy to the lab library, with the remaining inventory made available for recycling.
- Affirmative vote – unanimous (including Mike Thomas).

Action:

- Sam, Brendan, Mike, Brian and Brendin Sand and Andrew Thomas met at the lab April 22 to sort through the publication inventory, set aside copies for storage and remove the balance for recycling.
- A notice will be sent to the membership to pick up free copies at the lab prior to the Williston Basin Core Conference on May 13, 2022.
